

FRONTEND DEVELOPER INTERNSHIP

PROJECT REPORT

WEATHER APP

Submitted By, Name : Ankit

Technology Used:

HTML

CSS

Bootstrap

JavaScript

OpenWeather API

GitHub

GitHub Pages

INTRODUCTION

The Weather App is a web application developed using HTML, CSS, Bootstrap, and JavaScript. It uses the OpenWeather API to display real-time weather information for any city entered by the user. The project was developed as part of the Frontend Developer Internship.

OBJECTIVES

- **Learn HTML**
- **Learn CSS**
- **Learn Bootstrap**
- **Learn JavaScript**
- **Learn API Integration**
- **Learn GitHub**
- **Learn GitHub Pages**

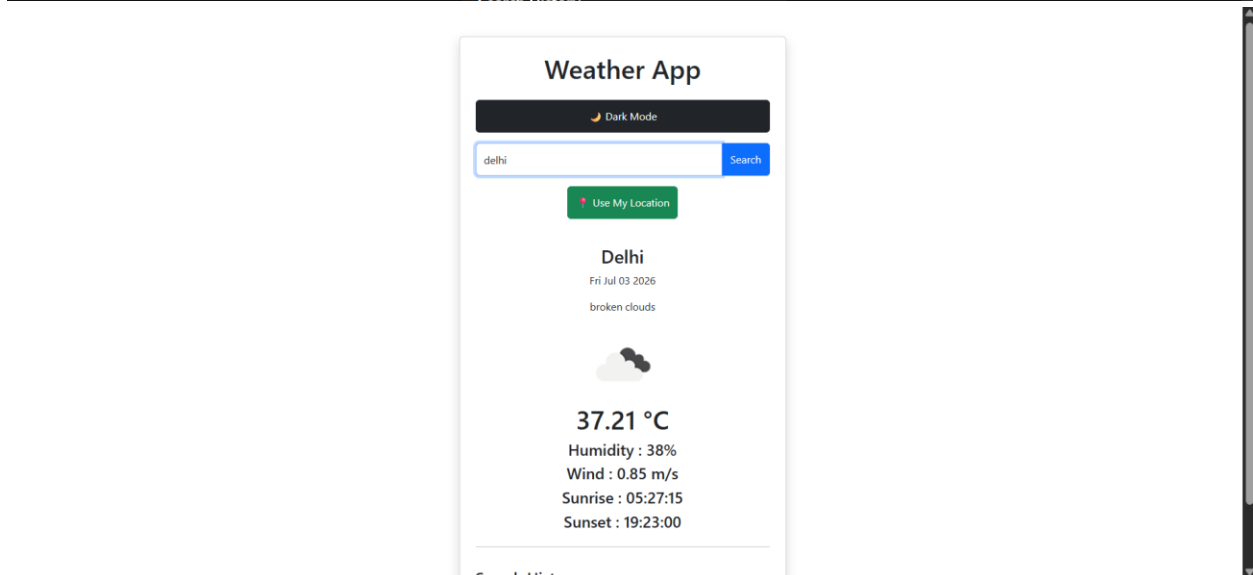

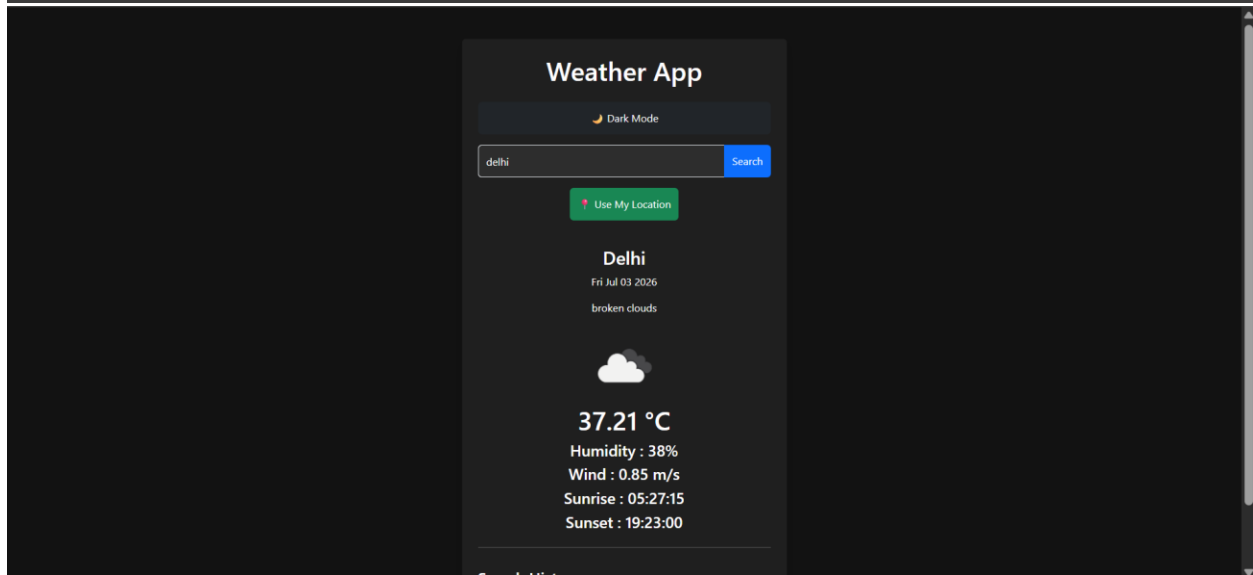

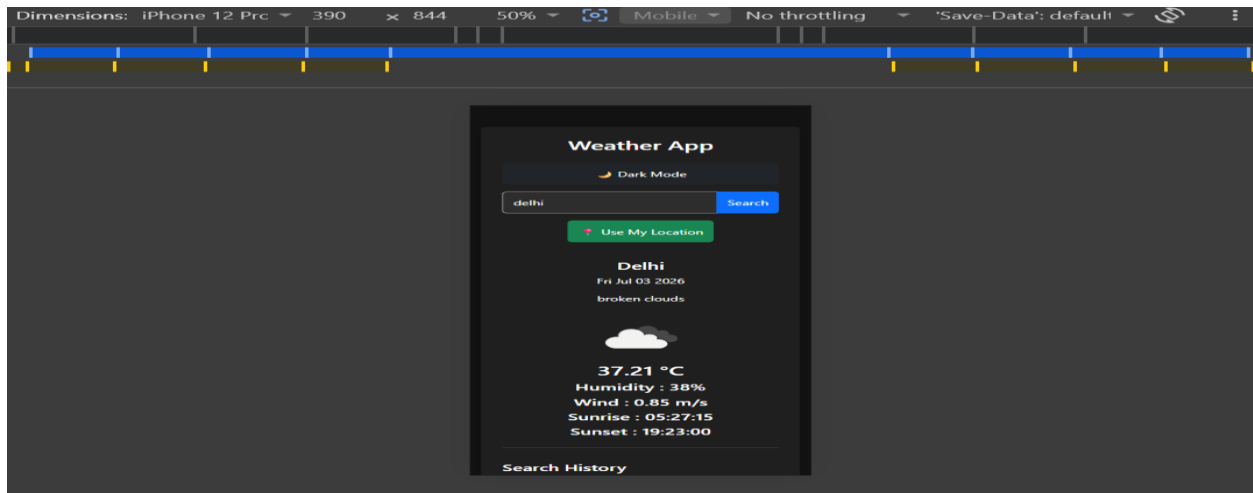

TECHNOLOGIES USED

Technology	Purpose
HTML	Structure
CSS	Styling
Bootstrap	Responsive Design
JavaScript	Logic
OpenWeather API	Weather Data
GitHub	Version Control
GitHub Pages	Website Hosting

FEATURES

- **Search Weather**
- **Weather Icon**
- **Temperature**
- **Humidity**
- **Wind Speed**
- **Sunrise**
- **Sunset**
- **Current Date**
- **Search History**
- **Dark Mode**
- **Responsive Design**

SCREENSHOTS

TESTING

Feature	Status
Search Weather	Passed
Weather Icon	Passed
Dark Mode	Passed
Search History	Passed
Sunrise	Passed
Sunset	Passed
Responsive Design	Passed

CONCLUSION

The Weather App was successfully developed and tested. All major features worked correctly. The project improved my knowledge of frontend development, API integration, GitHub, and website deployment.
